

2016 Advanced Course in Computer Graphics and Interfaces (Virtual Space Modeling)

Final assignment (**Submission deadline: December 26, 11:25 am**)

Choose one of the following two tasks and submit your report in PDF format via manaba.

A: Submit a free-format report on the two papers you presented in the lecture. The page length should be 3 for each paper (6 pages in total). Breakdown is as follows.

- First, describe your name, student ID number, and titles and author's names of the papers.
- Summarize the outline of each paper in 2 pages (you can quote figures in the papers).
- Summarize your impression for each paper in 1 page.

B: Select one keyword related to CG and interfaces, investigate the history about the keyword, and create a chronology. Submit a report in about 2-3 pages including the chronology. Breakdown is as follows.

- First, describe your name, student ID number, and the selected keyword.
- Summarize the chronology in 1 or 2 pages. Insert figures if necessary (specify the source).
- Add simple explanation in a half page

Keyword examples: image-based rendering, global illumination, sketch interface, shape modeling, virtual reality, pointing device, etc.
